

Policy statement

Tiger filtration ltd (the "organisation") recognises (and places great importance on) its environment and its vision is to ensure that it plays a part in the protection and long-term sustainability of the natural world. The organisation consistently aims to operate in an environmentally responsible manner and reduce its impact on its surroundings.

The main objective of the organisation's environmental policy is to reduce the amount of waste produced and resources used by the business. The organisation's first priority is to explore all avenues of waste reduction.

Once all waste reduction routes have been exhausted, the company aims to recycle as much of its waste as possible.

Duty of the organisation

The organisation recognises its duties to restrict its negative impact on the environment wherever possible. The organisation's commitments include:

- Minimising the generation of waste, resource consumption and preventing pollution as much as possible
- Optimally using resources and re-using materials wherever possible
- Implementing recycling initiatives for items that cannot be reduced or re-used
- Encouraging more sustainable purchasing practices by purchasing environmentally responsible items wherever practicable
- Influencing our suppliers and contractors to encourage them to be environmentally responsible
- Communicating the environmental policy to all employees and encouraging their involvement

The organisation aims to keep its environmental performance under constant review to ensure it continues to identify new areas where its environmental performance can be improved.
